

Crop Low

DESIGN RELM
OWNWORLD, AUSTRALIA

The Crop collection features a solid round timber seat gently chamfered, resting on top of a powdercoated aluminium accent plate. The collection's defining feature is a pinned bridle joint securing the legs to the rails, which is delicately sliced, or cropped, to expose the end grain. Solid timber foot rails are discreetly secured to the lower legs to add strength and stability.

The collection is constructed in Geelong, Victoria from American Oak – intricately hand-assembled, sanded and finished in a hard wax oil blend.

LEADTIME

4-6 Weeks

WARRANTY

3 Year Structural
