

Screenliner

DESIGN THINKING WORKS
THINKING WORKS, AUSTRALIA

Introducing Screenliner, a unique acoustic desk screen which creates a personal cabin space within the workstation. With features including integrated storage for phones, glasses, headsets and other personal effects, Screenliner provides built-in power and inductive charging facilities as well as concealed power management and ambient lighting.

Meanwhile, hidden height adjustable monitor supports eliminate the fuss and clutter of yesterday's office design.

The wire management compartment doubles as a modesty panel, with a removable front cover for easy access to segregated power and data cables. Screenliner is perfect for agile work environments with wayfinding identification badges that can be used for seat allocation.

Depending on your requirements, Screenliner can be optioned up to a first class experience, or toned down to premium economy. Either way, we're sure you'll cover more miles at your desk with Screenliner.
